Eriko Iwashita

Edmonton, AB | erikoiwashita@gmail.com | kellybytes.dev | github.com/KellyBytes | linkedin.com/in/erikoiwashita

PROFESSIONAL SUMMARY

Full-Stack Developer with a background in engineering and technical translation, bringing strong problem-solving skills and precision to web development. Experienced in building and deploying 30+ projects — including full-stack applications, REST APIs, and Stripe-integrated e-commerce platforms — using Next.js, React, Node.js, Express, Prisma, PostgreSQL, and MongoDB. Open to Front-End or Full-Stack Developer roles in Edmonton, AB or remote within Canada.

TECHNICAL SKILLS

Languages | JavaScript, TypeScript, HTML, CSS, Python
Frontend | React, Next.js (App Router), Tailwind CSS
Backend | Node.js, Express, REST APIs, Prisma, Mongoose, Authentication, Server Actions
Database | PostgreSQL, MongoDB
Tools | Git, GitHub, Figma
Cloud & Services | Netlify, Vercel, AWS Amplify, Firebase, Render (PaaS), Stripe, Upstash, Contentful

PROJECTS

Content Platform | *Next.js, React, Contentful, Tailwind CSS*

- Built a full-stack content platform with Contentful CMS, serving blog and knowledge base content
- Implemented separate Rich Text and Markdown rendering pipelines with Contentful draft preview mode
- Independently modernized an outdated Next.js tutorial into current App Router patterns

Real Estate Marketplace | *Next.js, React, Tailwind CSS, MongoDB, NextAuth.js, Server Actions*

- Built a full-stack property listing platform with secure server-side data mutations
- Implemented Google OAuth authentication with role-based protected routes via NextAuth.js
- Integrated Mapbox for interactive property maps using coordinates fetched from Google Geocoding API

E-commerce Web App | *Next.js, TypeScript, Stripe, PayPal, Server Actions*

- Built a full-stack e-commerce platform featuring a product catalog, shopping cart, and checkout flow
- Implemented secure server-side payment processing with Stripe and PayPal, including webhook handling
- Managed user authentication and product data operations via Next.js Server Actions

ProjectHub REST API | *Node.js, Express, MongoDB, JWT, Swagger, Jest*

- Built a RESTful API with JWT authentication, role-based access, and rate limiting
- Documented all endpoints using Swagger UI and achieved test coverage using Jest and Supertest

PROFESSIONAL EXPERIENCE

Patent Translator | *Self-Employed*

- Translated 400+ patent specifications in mechanical, electrical, and software domains
- Delivered high-precision technical documentation under strict deadlines

Technical Support Engineer | *LMS Japan*

- Provided technical support for measurement and analysis systems
- Localized and tested software interfaces and documentation

EDUCATION

Tokyo Metropolitan University (formerly Tokyo Metropolitan Institute of Technology)
Master of Engineering - MEng, Mechanical Engineering
